

PERFORMANCE FOCUSED SOLUTIONS

techflow marine Ltd provide a range of specialist products to the offshore oil & gas and marine industries. Our market focus is directed towards the prominent emergence and accelerated development of offshore reserves utilising FPSO/FSU units, whilst accommodating the requirements of conventional fixed platforms, jack-up rigs and semi-submersibles.

Our technically qualified team of Design and Project Engineers have extensive experience and knowledge of the design and supply of fluid transfer systems and associated mechanical, electrical and hydraulic equipment.

Current range of products include FPSO/FSU fluid transfer systems, hose handling systems, tandem mooring systems, large bore flexible hose systems, marine coupling systems and associated equipment. To complement these products, we can deliver complete integrated systems, incorporating advanced power, control and monitored systems.

Our engineering support team can assist the Offshore Installation designers and yards during all phases of engineering from initial Concept/FEED studies through to Commissioning/First Operation ensuring products are correctly specified to meet functional and technical requirements.

Skilled after sales personnel, provide extensive support services to ensure our products maintain excellent performance and safe, efficient operations through its lifecycle.

Hose Loading Stations (HLS)

for Diesel/Pot Water/ Chemical/Bulk Powder Loading Hoses

Fluid Transfer Systems (FTS)

for FPSO Crude Oil Offloading, Methanol Offloading, Fluid Transfer etc

Tandem Mooring Systems (TMS)

for EPSO to Shuttle Tanker Tandem Mooring Operations

Marine Coupling Systems (MCS)

Emergency or QC/DC Systems for flexible piping systems

Seawater Uptake Systems (SUS)

for FPSO/FSU Seawater Intakes. In partnership with

Cargo Offloading Hoses (COH)

In accordance with OCIMF 4th edition 1991. In partnership with

techflow marine assure high quality products and reliable service to all our customers, in an industry where quality and delivery are paramount.

We strive for excellence in the provision of Offshore and Marine Systems.
